

CLEVER SURVEY

SURVEYING AND AUDITING SOLUTIONS

**FORGET
MISSED INSPECTIONS,
WASTED TIME
AND POOR REPORTS.**

SURVEYING AS A CONTROL SYSTEM

Nowadays, every managed system in the global economy is built on data acquisition, analysis and dissemination. Surveyors and auditors are committed every day to gather evidences, providing professional advice for **risk assessment, loss prevention and damage mitigation.**

When duly planned, the survey is the perfect control system to reduce potential inconveniences, being the surveyor a specialist in his own field of activity, as concerns **suitability, quality and safety issues.**

WHY CLEVER SURVEY?

Clever Survey is a unique tool in the market

It's not a simple software but a customized workflow, **to share specific knowledge in surveys and audits**, providing electronic outputs in compliance with specific standards.

Clever Survey combines:

Experienced professionals

available to operate directly onsite

Smooth processes

to reduce time and costs, enforcing consistent delivery

Smart technology

to allow the user to operate with a scalable system

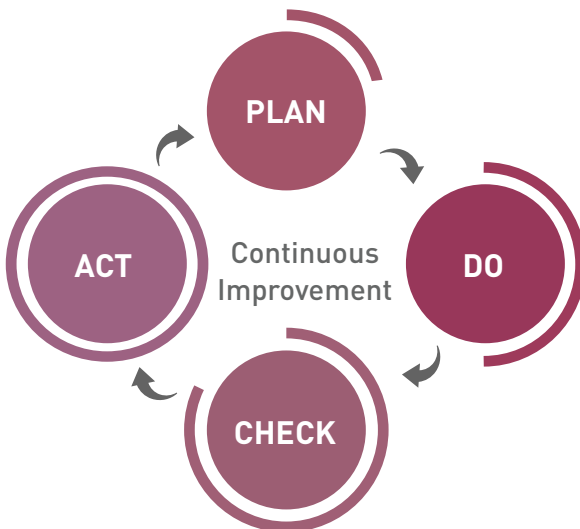

HOW IT WORKS

THE WORKING APPROACH

Inspired by ISO standards, the Clever Survey technology is based on PDCA workflow (plan-do-check-act, also known as *Deming cycle*) that is an iterative four-step management method used for business control and continuous improvement of processes.

Clever Survey inspections and audits are lead upon careful planning, leveraging on field expertise of involved personnel, **to take proper preventative and corrective actions** during all the phases of a project.

Consolidate your process through smart standardization

THE BENEFITS

Save time and money

Reduce mobility of resources

Survey program compliant with selected standards

Handy pdf output, paperless

Improve data analysis with csv output

Improve data collection and distribution

Easy knowledge sharing for future projects
